

CHIRAG R

FULL STACK WEB DEVELOPER

+91 89518 31967 | +1 647 493 4239  chirag.ramachandra@gmail.com  <https://www.chiragr.com>

PROFILE

Web Developer with 6+ years of experience in full stack web development. Experienced in all stages of the development cycle and have designed and executed multiple dynamic web projects. I am looking to work on interesting projects where my skills can be fully utilized and I have the chance to grow professionally

SKILLS

- MERN Stack | Redux | NextJS | PWA | AWS Cloud | GCP Firebase
- SOA | Microservices | MySQL | Linux | Vercel/ Zeit (for CI/CD Integration with GIT)
- HTML | CSS | Javascript | Bootstrap | Git | Splunk | Postman | SOAP UI
- WebMethods Developer 7.2-10.5 Integration Server | MWS | Centrasite | APIGEE

RELEVANT EXPERIENCE

● CollegePass, Principal Technical Architect

2018 - PRESENT

- Responsible for complete technology stack, including prototype, build, deployment and testing of CollegePass Technology Solutions, which is an Ed Tech Start Up (<https://www.collegepass.org/>)
- Designed and developed user-friendly web application, including optimized video platform integration using LAMP, MERN & Python. Continue to optimize website by applying enhancements to improve functionality and speed and generate increase of 15% jump in subscriber base month over month

● Freelance projects, Web Developer

2014 - 2020

- Developed dynamic and interactive website that ensured high traffic, page views and reservations for a boutique luxury home stay called The Vintage (<https://www.thevintageckm.com/>), online presence boosted sales by 60%
- Developed minimalist website with inquiry functionality for a small sized education consulting firm called Consult Aspire (<https://www.consultaspire.com/>) to create their web presence.
- Carried out full life cycle of software development from AWS integration to complete testing with delivery on time while staying 10% under clients' budget

OTHER EXPERIENCE

● Cognizant Technology Solutions, Associate - Projects

2018 - PRESENT

- Involved in all aspects of IT Project Management and led projects related to Enterprise Services and Application Integration including enhancement of existing code base and infrastructure for the client (John Lewis & Partners, UK)

● Accenture, Developer

2016 - 2018

- Implemented migration for the client (United Utilities, UK) within the WebMethods environment. Assisted in the build of a portal for end users for account management. Provided post production PRISM support

● Tata Consultancy Services, Systems Engineer

2014 - 2016

- Worked on API Implementation and provided solutions for continued updates of client's store / merchant system. Further, worked on self registration API which enables merchants of the client to set up their store by enabling them to create their own organization with multiple users.
